REASONS REPORT DEFINATIONS

This chart explains all of the potential reasons that might appear on your Reasons report.

Awarded by previous bids:	X number of pairings matched this bid preference, and were already awarded by a previous bid.
Awarded for coverage under a different bid:	Pairings matching this bid preference were already awarded, and are listed under a different bid preference.
Awarded to senior bidder:	Pairings matching this bid preference were already awarded to a bidder with higher seniority than you.
Awarded to senior shadow bidder:	Pairings matching this bid preference were already awarded to a shadow bidder with higher seniority than you.
Best Line Before:	The N-PBS Scheduler attempted to build a pairing block, but it could not be built using your bid preferences and the criteria set by the Administrators, so the N-PBS Scheduler moved to your next bid group, the results of this attempt are listed in your Reasons report.
Best Line Before Empty: No Pairing Awards Possible:	The best line before is empty, the N-PBS scheduler could not build a block with the pairings left in the available pairing pool.
Best Line Before Empty: Available Pairing Credit Insufficient (Line Not Attempted)	The previous pairing completion attempt produced an empty best line before because there was insufficient available pairing credit to build a line so it was not attempted.
Best Line Before Empty: Block Time Limit Insufficient (Line Not Attempted)	The previous pairing completion attempt produced an empty best line before because the N-PBS Scheduler calculated that a crewmember's Block Time Limit makes it unrealistic to complete a block.
Best Line Before Empty: SLG Could Not Find Line Including Priority Stack Date	An SLG completion attempt produced an empty best line before because SLG quit early as it was required to include the priority stack date and could not.
Beyond bid limit: X	X number of additional pairings matched this bid preference, but none were awarded because you placed a limit on the bid preference.
Bid denied	This bid preference was denied, and there are pairings on your block that contradict this preference.
Block is complete	This bid preference was not used to build your pairings because your pairings block was already complete before reaching this point. If a number appears after the "Block is complete" reason, it indicates the number of pairings that matched the bid but were not awarded because your block was already complete. That is, it reached the minimum or threshold credit value.
Buddy cannot take pairing	Your buddy could not be awarded this pairing, so it can't be awarded to you either.
Could Not Build Complete Line with Pairing	The pairing is available legally but cannot be used because it could not be fit into your block and still build a complete block.

REASONS REPORT DEFINATIONS

Filtered by higher bid: X	X number of pairings matched this bid preference, but were filtered out of the available pairings pool by Avoid Pairings or Prefer Off bid preferences that were higher in your bid.
Followed By sequence not found	No series of pairings could be found that matched your Followed By bid preferences.
Forgotten	Forget instruction was honored, and the N-PBS Scheduler ignored this bid preference.
Honored	This bid preference was used, and there are no pairings on your block that contradict this preference.
Item overlaps with another: X	X number of pairings matched this bid preference, but overlapped with something already awarded.
Matching: X	The total number of pairings that match this bid preference.
Maximum Max-Credit bidders Reached	The maximum number of Maximum Credit blocks have already been awarded.
Maximum Reduced Lower Limit Line Reached	The maximum number of RLL lines were awarded to senior bidders.
Minimum Base Layover line condition violated	The minimum base layover line condition could not be met with this bid preference, and some layovers are shorter than the minimum time requested.
Maximum Min-Credit bidders Reached	The maximum number of Minimum Credit blocks have already been awarded.
Needed for Legality	This pairing was awarded from a lower bid preference to honor either a MinDays Off, Min Days On or Pattern Set Condition bid preference.
Not considered	This bid preference was denied, but there are no pairings on your block that contradict this preference.
Not-Considered Below Reduced Lower Cutoff	You are below the RLL cutoff as defined by the administrator.
Not-Considered Reduced Block	This means that you are defined as a reduced block bidder; reduced block bidders cannot be awarded an RLL block.
Not honored	This bid preference was denied, and there are pairings on your block that contradict this preference.
Not qualified for language	You did not have the language qualification necessary for these pairings.
Not used	This bid preference was not used to build your block; either because your block was already complete or because you used a Clear Schedule and Restart bid preference.

APA 2118 TRAINING

REASONS REPORT DEFINATIONS

No pairings available	No pairings that met your Avoid Pairings and TimePrefer Off bid preferences were available to be awarded, usually because too many pairings were eliminated from the pairings pool by your Avoid Pairings and TimePrefer Off bid preferences.
Partially honored	This Prefer Off bid preference was used, but there are also pairings on your block that contradict a portion of this preference. If you submit a range of dates that you want to be free of duty, the N-PBS Scheduler may be able to honor part of the range but not all of it, resulting in a partially honored bid preference.
Restricted location	You were not qualified for the locations of the available pairings your personal profile restricts you from landing in stations in the available pairings.
[Rule violation]	A FAR rule, or other legal consideration, prevented this bid preference from being honored the rule is identified in the reason included on your report.
Over maximum credits for period	The pairing would have caused your block to exceed the maximum credit value for the bid period.
Prevents assignment of minimum GDO	The pairing would have caused your block to contain more than two single GDOs.
Too many above	You were not awarded a reserve block because the number of reserve blocks already awarded to senior bidders exceeded your maximum number.
Violates green on green	The pairing could not be awarded without violating the green on green rule.
Additional Messages: You may see the following messages at the top of your Reasons report. These messages indicate that the N-PBS Scheduler had to ignore some of your preferences to give you a complete block or meet legal requirements or airline targets.	
Affected By Denial Mode	The N-PBS Scheduler had to deny some or all of your bids in order to build you a complete block.
Affected by SLG	The N-PBS Scheduler could not build you a block using any of your preferences and reached the end of Denial mode, so your block was built using secondary line generation (SLG).
Affected By Coverage	A pairing or pairings were forced onto your block in order to meet airline targets for total number of pairings remaining in open time.
